

SF DAY OF CIVIC HACKING @ SF STATE

DEVELOPERS + DESIGNERS + SCIENTISTS + ARTISTS + EDUCATORS

WHAT DO YOU DO AT A HACKATHON ANYWAY?

At a civic hackathon, people who know and love technology (software developers, designers, entrepreneurs, etc.) come together with people who know and love urban issues (city staff, local organizations, community members and leaders) to use technology and their collective skills to build solutions that matters to our city, and other cities too.

WHAT IS A CIVIC HACKER?

"Civic hackers" as we think about it for the National Day of Civic Hacking are engineers, technologists, civil servants, scientists, designers, artists, educators, students, entrepreneurs - anybody - who is willing to collaborate with others to create, build, and invent open source solutions using publicly-released data, code and technology to solve challenges relevant to our neighborhoods, our cities, our states and our country.
